TrimMatrix / Backend ERD

Live schema verified 24 October 2026 | 14 public tables + auth identity | 19 foreign keys

TrimMatrix backend — live PostgreSQL schema

PK = Primary key FK = Foreign key UK = Unique key | Circle = optional; crow's foot = many. Selected fields shown; full dictionary is in docs/backend/README.md.

POS bills, contacts, employees, expenses and payouts sync through business_snapshots.payload (JSONB). Storage paths are not foreign keys. contract_reminders is a view.
