Backend Models and Schema

DiscountType: none | percent | amount

ExpenseStatus: paid | unpaid

UserModel

Field	Type	Reference
id	String	Primary key
name	String	
username	String	
phone	String	
passwordHash	String	
createdAt	DateTime	

ShopModel

Field	Type	Reference
id	String	Primary key
ownerId	String	User.id
businessName	String	
phoneNumber	String	
businessType	String	
city	String	
area	String	
address	String	
logoUrl	String?	
createdAt	DateTime	

ShopSettingsModel

Field	Type	Reference
shopId	String	Primary key / Shop.id
taxPercent	double	
currencyCode	String	
specialistCategories	List<String>	

Employee Models

EmployeeModel

Field	Type	Reference
id	String	Primary key
shopId	String	Shop.id
firstName	String	
lastName	String	
phoneNumber	String	
cnicNumber	String	
homeAddress	String	
isActive	bool	
photoUrl	String?	
speciality	String?	
employeeType	String?	
basicSalary	double?	
commissionPercent	double	
agreementDescription	String?	
createdAt	DateTime	

EmployeeAssignmentModel

Field	Type	Reference
id	String	Primary key
shopId	String	Shop.id
employeeId	String	Employee.id
assignedToEmployeeId	String	Employee.id

Service and Customer Models

CategoryModel

Field	Type	Reference
id	String	Primary key
shopId	String	Shop.id
name	String	

SubcategoryModel

Field	Type	Reference
id	String	Primary key
categoryId	String	Category.id
name	String	

ServiceModel

Field	Type	Reference
id	String	Primary key
shopId	String	Shop.id
subcategoryId	String	Subcategory.id
name	String	
gender	String	
ageGroup	String	
price	double	
isActive	bool	

CustomerModel

Field	Type	Reference
id	String	Primary key
shopId	String	Shop.id
name	String	
phone	String	
createdAt	DateTime	

Billing Models

BillModel

Field	Type	Reference
id	String	Primary key
shopId	String	Shop.id
customerId	String?	Customer.id
employeeId	String	Employee.id
customerName	String	
customerPhone	String	
employeeName	String	
commissionPercent	double	
paymentType	String	
subTotal	double	
discountType	DiscountType	
discountValue	double	
discountAmount	double	
taxPercent	double	
taxAmount	double	
grandTotal	double	
createdAt	DateTime	

BillItemModel

Field	Type	Reference
id	String	Primary key
billId	String	Bill.id
serviceId	String?	Service.id
serviceName	String	
quantity	int	
unitPrice	double	
tag	String	

Expense and Payment Models

ShopExpenseModel

Field	Type	Reference
id	String	Primary key
shopId	String	Shop.id
employeeId	String?	Employee.id
customerId	String?	Customer.id
billId	String?	Bill.id
date	DateTime	
amount	double	
status	ExpenseStatus	
paymentType	String	
expenseType	String?	
quantity	int?	
description	String?	
createdAt	DateTime	

EmployeePaymentModel

Field	Type	Reference
id	String	Primary key
shopId	String	Shop.id
employeeId	String	Employee.id
amount	double	
bonusAmount	double	
paidAt	DateTime	
note	String?	

EmployeePaymentAllocationModel

Field	Type	Reference
id	String	Primary key
paymentId	String	EmployeePayment.id
workDate	DateTime	
incomeAmount	double
